[Click here for printable information on 2010 Conference Sponsorship!](#) We've added more opportunities this year...

The Ark-La-Tex Chapter will hold nine Traffic Safety Summits, three in each of the states we serve: Louisiana, Arkansas and Texas, in an effort to bring everyone in our service area this life-saving message. Admission is free, but your financial support is needed.

Due to the National Safety Council's efforts at legislating for safety; public awareness campaigns, websites, publications and training such as defensive driving, emergency care and occupational training, many injuries and deaths have been averted.

The goals of the conference are to bring the safety and health community together to share knowledge, product information and services to prevent injury and death in the workplace. The itinerary includes speakers, networking opportunities and time to view the exhibits.

Some peripheral benefits of attending include networking and relationship building among our members, and a chance to introduce future members to the benefits of membership.

We have structured a sponsorship that gives you half of your donation back in training dollars. These sponsorships enable us to offer the conference for free for benefit of the business community.

As an added bonus, each member company may now have an exhibit booth for free at the conference. Use your booth to display your product, service or as a way to let other know about your safety program.

We hope you will pledge your support for this event now and work with us to make this event an ongoing event for your area.
